## Logistics

We are a global organization with offices in the United States, United Kingdom, India, and Hong Kong.

Typical project teams consist of a combination of data architects, data scientists, and industry experts. Core project teams are supplemented with additional skillsets (Business Analysts, Testing Specialists) on an as needed basis.

Depending upon the type of service, and the complexity of the engagement, we will construct a bespoke team with the appropriate skillsets and create a customized effort estimate for you.
